	Nansen Van Dorn (Vertical)		unit	35.000.000
	Designed for taking samples at the middle layer and two or more bottles can be jointly used.			
	Large volume of water can be gathered easily and no metal is used for the sampling part, so the water obtained is suitable for the following researches. (Tube is made of plastic, lid is made of rubber)			
	Research of metals in sea water, quantitative analysis of radio active substances in sea water, Measurement of primary production, Research of bacteria, with one messenger.			
	Capacity : 2 liter			
	Dimensions : 15 x 13 x 57(H) cm			
	Weight : 3,5 kg			
	Nansen Van Dorn (Horisontal)		unit	21.550.000
	Designed for sampling water from desired depth in flows of river			
	The sampling cylinder and lid is similar to Van Dorn Vertical.			
	The sampler provides with rudder flap which makes cylinder inlet face to the current direction, and the lid is closed by dropping messenger.			
	Capacity : 2 liter			
	Dimensions : 165 x 540 x 300(H) mm			
	Weight : 5,5 kg approx			
	Material : Brass (except cylinder and lid)
